

Geography

Our children are exposed to a high quality Geography curriculum which inspires curiosity and fascination about the world and its people. We have a strong progression of skills in place which provide a secure foundation for Geography. This, in turn, develops confident geographers who become responsible global citizens.

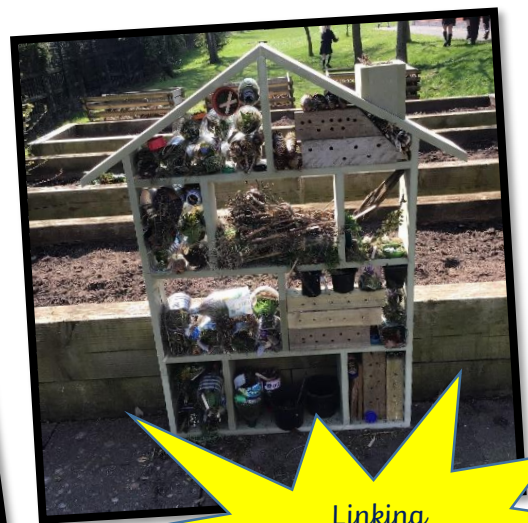

We develop our children's knowledge and understanding of the key skills outlined in the National Curriculum; promoting their interest in places, people, resources, natural and human environments and the Earth's key physical and human processes. Our bespoke Geography curriculum and learning environment promotes a love and passion of Geography, which prepares our children for Key Stage 3 and adult life.

Geography skills through Computing

Year 4 - Science Habitats

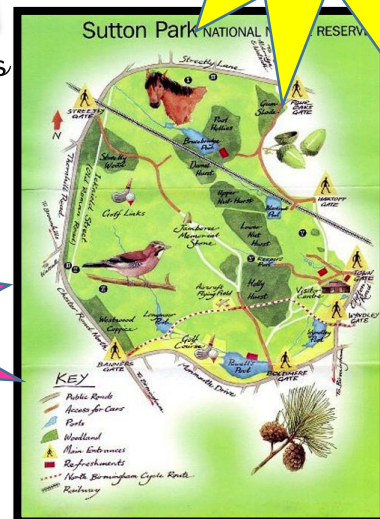

Eco Council

Linking Geography to the wider curriculum

Year 5 - Dovedale

School Trips

Year 6 - Sutton Park Collaboration Day
