

Science

Science at Walmley Junior School is an integral part of the curriculum. In exciting, practical ways we discover the world around us and understand how science relates to everyday life.

Promoting scientific enquiry, we ask scientific questions, problem solve and use key vocabulary to build and extend our knowledge.

We love being scientists!

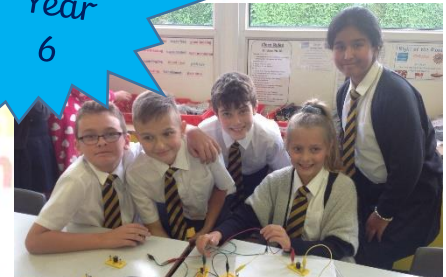

Year 3

Year 5

Our exciting Science Club means we can continue to be explore Science after school.

I've never done any of the things we did before, so it was really nice to try something new. It is the best club ever!

Our school grounds and Food Technology room are a great places to learn about Science.

We are delighted that our passion and enthusiasm for Science has been recognised by the Primary Science Quality Mark.
